

AHEAD OF OUR CONVERSATION

A few things we'd love to explore

To help us make the most of our 30 minutes together, here are the areas we'd love to explore. **There's no need to prepare anything formal** — these are simply conversation prompts, and please add anything else you think would be helpful for us to understand.

01

The business today

A quick picture of where the business is now — its growth, customers, markets, and anything that has materially changed over the past 12 months.

02

Where you're heading

Your most important priorities over the next 12–18 months, and where greater visibility, credibility or authority could make a commercial difference.

03

Who you need to reach

The customers, partners or audiences you most want to find and trust the business — and what you'd want them to understand when they discover you through media, search or AI platforms.

04

What you want to be known for

How the business is perceived today, what may be misunderstood or underappreciated, and what you'd like to be known for in three to five years.

05

The founder story

The story behind why the business was created, how the founders came together, and the experiences or beliefs that have shaped the way you operate.

06

The opportunity for PR

Any results, data, partnerships, milestones or insights that may help bring the story to life — and what a successful engagement would ultimately help you achieve.

That's it — **no homework required**. We'll guide you through it on the day. Come as you are, and we'll do the rest.
